DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Examiner is relying upon Applicant's arguments for the patentability of the instant claims, specifically Applicant's argument that Jager et al., Karl or Karl in view of Suzuki et al do not provide an oxidizing a pigment in an aqueous environment/medium with ozone while simultaneously subjecting the pigment to at least one dispersive mixing operation therefore does not render obvious Applicant's composition of same was found persuasive and therefore the rejection of the claims has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
